

**Name, academic degrees:**

Taubman Scholar designation

A. Alfred Taubman Medical Research Institute

Faculty / academic title

**Highlights:** Please write a summary sentence or paragraph here and bullet two to four highlights of your laboratory accomplishments since last report (research findings, publications, clinical trials, major grants)

- Example one
- Example two
- Example three

**Research accomplishments:** Please write a narrative summary of one or more research projects here, emphasizing lay terms and descriptions of your work vs. scientific language.

It's also fine to include background about the prevalence of the condition you are studying, how patients are affected by absence of treatment, etc. as background or by way of explaining the impetus for your research. I.e. "Patients with ALS tend to die of respiratory failure when the nerves that control breathing muscles fail; hence we are exploring the possibility of stem cell injections into the upper spinal cord as a possible treatment for the affected neurons.")

**Clinical accomplishments:** Please summarize any clinical trials in progress or planning stages.

**Other accomplishments:** Please list papers (Publication, date, title), grants, awards or other milestones since last report.

**Future goals:** Please summarize your future research strategy and goals; if possible noting activities that are supported by your Taubman Emerging Scholar grant.
